[REVISITING USER]

①

WELCOME BACK Lees,

Time	Waiting Time	Walking Time	Activity
11-12	10	5	Disney
2-1	20	5	Battlestar
1-2	5	10	Fire Show
2-4	60	5	Lunch
4-5	30	15	Mummy
5-7	70	5	me

Your updated itinerary

Kiosks will automatically remove visited attractions from the table.

④

Homepage

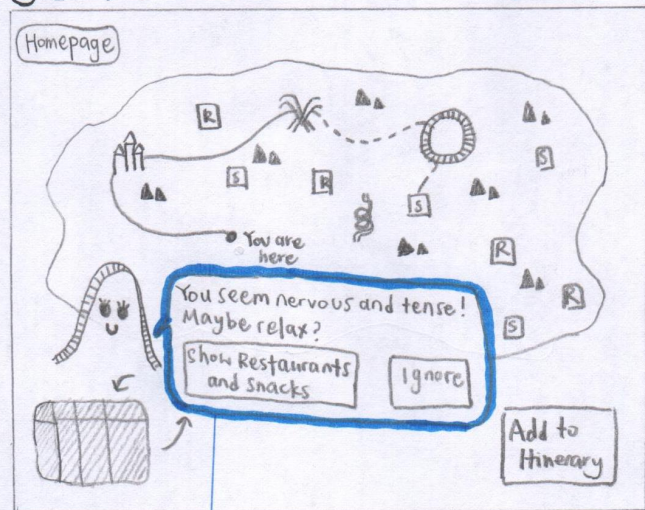

[Your Itinerary]

Time	Waiting Time	Walking Time	Activity
10-11	0	10	Light Show <input checked="" type="checkbox"/>
11-12	20	10	Battlestar Gray <input checked="" type="checkbox"/>
12-1	60	15	Mummy Ride <input checked="" type="checkbox"/>

The mummy ride has the shortest estimated waiting time now, compare to rest of the day! Make it top of list!

Kiosk also automatically informs user when a ride has the shortest waiting time at the moment and suggests it to user.

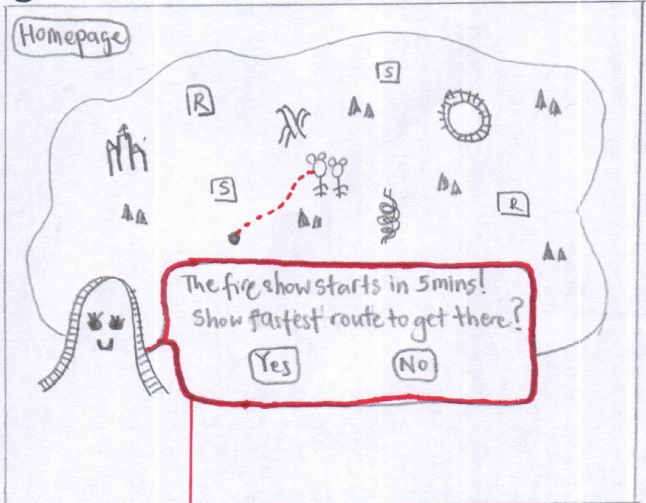

② [Function is ②, ③, ④, ⑤ are also present when a first-time user is using the kiosk but is more applicable to revisiting users.]

Kiosks will detect users moods and emotions and intuitively suggest activities to users to add to itinerary.

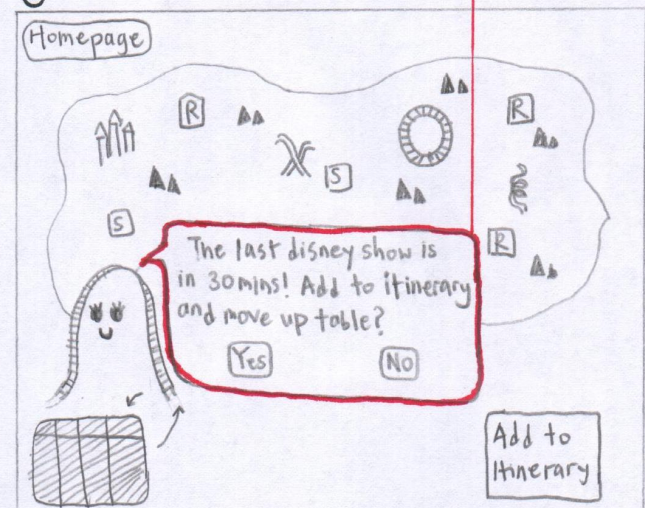

Kiosks will suggest to users to add live shows near them or those ending and happening soon.

⑤

The kiosk also informs user when shows are starting soon (shows that are in their list), should they get carried away while using the kiosk, and provides fastest route to get to shows.

③
